Okuma OSP Operating Panel 5020MSY (OSP5020M)
Monitor E0105-800-142

Matsushita TR-121AYB Monitor

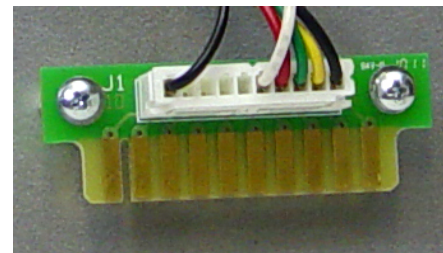

Dynamic Displays, Inc. offers a cost effective 10.4" LCD monitor replacement for the Okuma E0105-800-020, Okuma E0105-800-138 and Okuma E0105-800-142 12" monochrome monitor used in the Okuma OSP Operating Panel Series. This LCD replacement monitor, model QES1510-027 has a rugged steel chassis and is designed to drop into the mounting frame of the original Okuma OSP Operating Panel Monitor. In addition, this new 10.4" LCD monitor has mating video, power input connections, circuitry and firmware engineered specifically for plug and play installs into the Okuma E0105-800-020, E0105-800-138, E0105-800-142 and Matsushita TR-121AYB.

Because many of these systems date to the early 80's, equipment owners find it very difficult to find replacements for their Okuma CNC Monitors. In some instances, even Okuma no longer supports the particular CNC Machine or system. Our engineering staff will be happy to customize a rugged LCD display to meet the unique Okuma CNC Monitor specifications required and extend the life of your production equipment.

We guarantee it will work in your old control. For the past several years, Dynamic Displays, Inc. has concentrated on designing and producing LCD replacement monitors for obsolete and hard-to-find legacy CRT and Industrial Monitors. Drawing on twenty five years of experience in manufacturing CRT displays for the OEM market place, DDI has developed and produces LCD display solutions for a wide range of CNC Machine Tools, Factory Automation, Process Controls and other legacy manufacturing systems.

Features:

- Designed For Okuma 5000 ASG (OSP5000L) Control Series
- Designed For Okuma 5000 LSG (OSP5000L) Control Series
- Designed For Okuma 5020 LSY (OSP5020L) Control Series
- Matsushita TR-121AYB Monitor Replacement
- Drop directly into the Okuma OSP Operating Panel
- Okuma 12" Monochrome monitor CNC Timing
- 10 Pin Edge Input video Connector
- 10.4" TFT-LCD Display with LED backlight
- High Contrast – 700:1 Typical
- High Brightness - 450 Cd/m²
- Power Requirements: 12VDC @ 1Amp
