

*Motorola DS3000 Monitor Series- DS3000-140A & DS3000-340A  
12 in 110° CRT Display TTL Input  
QES1510-026*

In need of an upgrade for your old Motorola DS3000-140A or Motorola DS3000-340A monitor? Take a look at the QES1510-026 Industrial monitor. This LCD upgrade attaches easily to the existing monitor frame and is plug-and-play compatible with the 12 in 110° CRT Display TTL Input signal. Just plug it in and you are up and running.

Upgrading your legacy Motorola DS3000 Series CRT monitor with our LED-backlit LCD Replacement Monitor increases productivity, reduces waste, eliminates downtime, and extends the life of your automation investment. As a result of the brighter, sharper, and crisper images provided by the new LCD, operators no longer have to squint to view dim or out-of-focus screen data that can result in operator errors and wasted time and materials. Downtime due to aging monitor repairs is no longer a concern and you can continue to rely on your older machine with minimal expense and effort.

Our replacement monitors are ruggedly constructed and designed to be fitted on the brand-name legacy monitors used in most industrial monitor applications such as CNC Machine Tool, Factory Automation, or Process control equipment. So, replace your old, low-performance CRT display with a new, affordable, quality replacement LCD monitor manufactured by Dynamic Displays, Inc.

**Features:**

- **This model also replaces the following monitors: Allen Bradley 1784-T36 and 7300-ACRT, Ball Brothers TV120, GE 277A5758G2, and Kristel 25RE-A42.**
